Re: QCX LLC -- Rule Self-Certification Pursuant to CFTC Regulation 40.6(a): Specialized Liquidity Provider Program

Dear Mr. Kirkpatrick:

QCX LLC (“Polymarket US” or “Exchange”) hereby notifies the Commodity Futures Trading Commission (“CFTC”) that, pursuant to Exchange Rule 4.1, Section 5c(c) of the Commodity Exchange Act (“CEA”), and CFTC Regulation 40.6(a), it is implementing on March 18, 2026 a Specialized Liquidity Provider Program (“Program”) and associated Form Market Maker Framework Agreement which implements a rebate-based program based on objective, preestablished quoting criteria applicable to all eligible participants with the purpose of improving market depth, efficiency, and execution quality.

The Terms and Conditions of the Specialized Liquidity Provider Program is attached as Exhibit A. The Form Market Maker Framework Agreement is included and segregated as Appendix B, for which the Exchange seeks confidential treatment. Capitalized terms used in this notice but not defined herein shall retain the meanings assigned to them in the Exchange’s Rulebook. The Program will be effective on April 1, 2026.

I. Concise Explanation and Analysis of the Revisions, and Their Compliance with Applicable Provisions of the CEA, Including the Core Principles and Commission Regulations

The Program is being adopted pursuant to and in accordance with Polymarket US Rule 4.1, which authorizes the Exchange to designate Participants as Market Makers, subject to specified qualifications, obligations, and benefits. The Program complies with the CEA and the rules and regulations promulgated thereunder, including the Core Principles, including those most relevant to the Program: Core Principles 2, 4, 9, 12, and 19.

Core Principle 2 requires the Exchange to establish, monitor, and enforce compliance with its rules, including those regarding access and contract terms and conditions, and prohibiting abusive trade practices. The Exchange will maintain written policies and procedures governing the monitoring, calculation and payment of Program incentives, and will retain records sufficient to demonstrate compliance with such procedures. The Program will be governed in accordance with the Exchange Rulebook, Chapter 4 of which sets forth rules governing market maker programs, including those dictating the Exchange’s ability to designate, suspend, terminate, and restrict Market Makers in its discretion.

Core Principle 4 charges the Exchange with preventing manipulation, price distortion, and disruption via market surveillance, compliance, and enforcement practice and procedures. Core Principle 12 requires the Exchange to protect its markets and market participants from abusive practices. The Exchange’s Rulebook sets forth rules regarding market maker obligations, participant conduct, and rule enforcement that prevent market manipulation, price distortion, other disruptions,

and abusive practices and that promote fair and equitable trading. Program participants are subject to the Exchange's rules and all other applicable laws and regulations. The Exchange has evaluated the Program and determined it does not create material incentives for manipulative or disruptive trading practices because incentives are primarily based on satisfaction of quoting obligations, including uptime, spread, and size, and may incorporate executed volume as a secondary component as specified in participant agreements; surveillance systems monitor for wash trading, spoofing and layering; and the Exchange retains authority to withhold or claw back incentives.

Core Principle 9 requires the Exchange to provide a competitive, open, and efficient market, Core Principle 12 requires the Exchange to promote fair and equitable trading, and Core Principle 19 generally prohibits the Exchange from taking any action that imposes an unreasonable restraint of trade or a material anticompetitive burden on trading. Participation criteria are objective and applied in a non-discriminatory manner, and the Exchange does not limit the number of participants except as reasonably necessary for market quality. Quoting requirements are standardized by product class and applied uniformly to similarly situated participants, with any deviations documented and justified based on liquidity needs and subject to compliance oversight. The Program does not place any unreasonable restraint on trade or create a material anticompetitive burden. Rather, the Program will promote fair and equitable trading and a competitive, open, and efficient marketplace by improving market depth, efficiency, and execution quality.

II. Description of Incentive Calculation

Program incentives are calculated based on measurable quoting metrics including uptime, spread, size, and coverage, as defined in Exhibit A. The Exchange will apply these metrics uniformly and will maintain records of calculations.

III. Certification

QCX LLC hereby certifies to the CFTC, pursuant to the procedures set forth in Commission Regulation 40.6, that the attached incentive program submission complies with the CEA, as amended, and the regulations promulgated thereunder. Further, the Exchange is not aware of any substantive opposing views expressed regarding the proposed fee change.

QCX LLC additionally certifies that, simultaneously with this filing, a copy of this submission was published on the Exchange's website.

Please contact me using the information below if you have any questions regarding this notice.

Sincerely,

Andrew Clifford
Chief Compliance Officer
QCX LLC

Appendix A: Terms and Conditions Specialized Liquidity Provider Program

1. Purpose

The Program is designed to improve market depth, efficiency, and execution quality in event contract markets listed on Polymarket US.

2. Summary

The Program applies to all Polymarket US event contract markets and consists of form agreements that clearly specify the Assigned Contracts, quoting obligations, and incentive structure applicable to each participant in the Program (“Program Participants”), including documents setting forth the products for which Program Participants will maintain two-sided markets within a defined spread and with a minimum depth during trading and their related obligations and incentives. The Program implements a rebate-based incentive structure to encourage such trading activity. Program Participants are subject to the terms and conditions of the Polymarket US Participant and Clearing Member Agreement, the Polymarket US Rulebook (the “Rulebook”), and the Program Participant’s Market Maker Framework Agreement, with any conflicts among such documents governed by the provisions set forth in the Program Participant’s Market Maker Framework Agreement.

3. Term

The Program will be effective beginning on April 1, 2026 and continue until March 31, 2029, unless the Exchange extends the Program or amends or terminates the Program at an earlier date. The Exchange will provide reasonable prior notice to the Commission and market participants of any material amendments or termination, consistent with Part 40.

4. Eligibility

Any Polymarket US Participant that satisfies the Exchange’s market maker eligibility criteria, as outlined in Chapter 4 of the Rulebook, may apply to be a Program Participant. Approval for participation in the Program is subject to the Exchange’s discretion, applied pursuant to objective, pre-established, and non-discriminatory criteria, consistently across applicants. Any denial shall be documented and subject to compliance review.

5. Obligations

Program Participants must maintain two-side markets within a defined spread and with a minimum depth during trading hours. Quoting Requirements will be objectively defined, measurable, and uniformly applied across similarly situated participants. Each Program Participant’s specific obligations and conditions are set forth in its respective Market Maker Framework Agreement.

6. Incentives

The Program offers performance-based rebate incentives based on pre-defined metrics and methodologies disclosed to participants, including threshold for Uptime, Size, and Spread. Program incentives are set forth in each participant’s respective agreement and will be available upon satisfying all Program obligations as determined by the Exchange.

7. Monitoring and Termination

The Exchange shall monitor trading and order activity and Program Participants’ performance, and shall retain the right to revoke Program Participant status if it determines that the Program Participant no longer meets the eligibility requirements of the Program. The Exchange will maintain audit trails and records sufficient to demonstrate compliance with Program requirements and incentive determinations. In addition, the Exchange shall monitor the activity of Program Participants to ensure compliance with Rulebook. If a Program Participant is alleged to have violated, to have aided and abetted a violation, to be violating, or to be about to violate, any rule in the Rulebook, the

Exchange, at its discretion, may terminate the program or revoke Program Participant. Awards will be withheld or clawed back for abusive or manipulative conduct.

8. Governance and Termination

Program administration is subject to review by the Chief Compliance Officer and the Exchange's governance processes. The Exchange will implement controls to mitigate conflicts of interest, including separation between commercial and compliance functions. Program benefits and designation decisions will be based on transparent, objective criteria to minimize conflicts of interest and avoid unfair discrimination among market participants. The Program will be supervised by the Exchange's compliance department.

9. Definitions

- "Assigned Contracts" means markets designated by Polymarket US as included in the Program.
- "Coverage" means the percentage of Assigned Contracts on which a Program Participant maintains qualifying quotes during a Measurement Period in accordance with the Quoting Requirements.
- "Quoting Requirements" means the requirements a Program Participant must meet for the Assigned Contracts.
- "Size" means the number of Contracts displayed on each side of the market by a Program Participant.
- "Spread" means the difference in U.S. Dollars between the bid and ask prices quoted by a Program Participant.
- "Uptime" means the percentage of time during a Measurement Period that a Program Participant maintains Qualifying Quotes for the Assigned Contracts.
- "Trading Hours" means the hours during which an Assigned Contract is available for trading on the Exchange's central limit order book, as established by the Exchange and published in its Rulebook or product specifications, excluding any periods of scheduled maintenance, trading halts, or force majeure events.
- "Measurement Period" means the discrete interval over which a Program Participant's compliance with Quoting Requirements is evaluated, as specified by the Exchange, which may be calculated on a daily, hourly, or other periodic basis, and applied consistently across all Program Participants.
- "Qualifying Quote" means a firm, two-sided bid and offer entered by a Program Participant into the Exchange's central limit order book for an Assigned Contract that, at the time of entry and for the duration it remains active:
 - meets or exceeds the Minimum Size Threshold on both sides,
 - does not exceed the Maximum Spread Threshold, and
 - is continuously displayed and executable in accordance with Exchange rules.
- "Minimum Size Threshold" means the minimum number of contracts that must be displayed at both the bid and the offer by a Program Participant for a quote to qualify under the Program, as specified by the Exchange for each Assigned Contract and applied uniformly to similarly situated participants.
- "Maximum Spread Threshold" means the maximum permissible difference, expressed in U.S. dollars or ticks, between the bid price and the offer price of a Qualifying Quote for an Assigned Contract, as specified by the Exchange and applied uniformly to similarly situated participants.
